### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 22, drawn to a method of inhibiting microbial growth in a skin injury, classified in class 424, subclass 405.
  - II. Claims 23 – 49, drawn to a medical dressing comprising an antibacterial composition, and method for its use, classified in class 424, subclass 443.
  - III. Claims 50 - 53, drawn to a kit for preparing an antimicrobial composition, classified in class 424, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I, which is drawn to a method of inhibiting bacteria growth in a wound, does not require the dressing of group II. The dressing of group II acts as a support to an antibacterial composition yet this support is not required in the inhibitory method of group I. Group I is unrelated to group III in that the method does not require the instructions or packaging described by the kit of group III. Group II is unrelated to group III in that the dressing and the method of using the dressing do not require the instructions of kit preparation as described in group III.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1615

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to David Hayzer on 7/30/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Micah-Paul Young whose telephone number is 703-308-7005. The examiner can normally be reached on M-F 7:30am-4: 30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K Page can be reached on 703-308-2927.
